

HOW-TO GUIDE

Our project is scattered across different notebooks. They must be open and execute in the following order:

- 1- file_iniziale.ipynb
- 2- gfk_divisione_prod.ipynb
- 3- manipolazione_prodggroups.ipynb 4- modelli_kfold.ipynb
- 5- modelli_nocovid.ipynb
- 6- modelli_testspec_nocovid.ipynb 7- grafici.ipynb
- 8- forecast.ipynb

In the Report and in the “Appendix A: Code Description” will be present further information about every step of our work.

Additionally, we add also the file ‘FORECAST.csv’ that contain the results of our prediction.
